

## Manually create an angular component

### Head.component.ts

```
Import { Component } from '@angular/core';
@Component{
  selector:'app-header',
  templateUrl;head.component.html;
}
export Class HeaderComponent
{

}
```

### app.module.ts

```
Import { HeaderComponent } from './head/head.component';
@NgModule ({
  declarations : [
    AppComponent,
    HeaderComponent
  ]
})
```
